Dear Parents,

Do your kids sit around the house complaining they have nothing to do in the summer? Do you struggle to find affordable and fun summer activities for your children? Do you run out of ways to keep your kids entertained in the summer? Then this guide will make your summer better!

There are many FREE or low-cost family friendly activities throughout our community and the Summer Resource Guide has all the details! In this guide, you will discover summer activities from a variety of local organizations – and there are enough activities to keep your children busy, engaged and having fun all summer long.

The best part about your children being involved in community summer activities is that they not only keep kids from being bored, but they also help them to build stronger family relationships, to learn social skills, to establish positive connections to their community, and to build relationships with other caring adults outside of the family. These relationships and skills gained through community activities help children to be healthier, happier and more successful as they grow.

We hope you will find this Summer Resource Guide to be useful as you make plans for summer! For more community information and resources, check out our website at: www.pathwnc.org. And remember...the Yancey Transportation Authority (682-6144) or Mitchell Transportation Authority (688-4715) are **happy to help with transportation needs during the summer months.**

Best wishes for an amazing summer,

Your Friends At PATH
